***Claim Objections***

1. Claim 5 is objected to because of the following informalities: the claim should end with a period, not a comma. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Levinrad.

Levinrad shows a base 26; article 32; sharp tip 34a; attaching means 24; water cooler 2; the device is sharp enough, long enough and strong enough as noted in column 3, lines 21-40; the device is an independent structure as noted in column 3, lines 22-25 and is an integral ("made up of parts forming a whole", *Webster's New World Dictionary, Third College Edition*) structure of the water cooler as it is a part that forms the whole.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Deruntz, Page et al., Gaines, Pogue, Ceschin et al., Studer et al., and Baker et al. show other cap piercing devices for liquid containers.
